

Techtel is a Singapore-based systems integrator in the fields of broadcasting and media technology, specializing in the television, media and telecommunications industries.

With a powerful consortium of strategically sourced global vendors and services in consulting & development, systems integration and service & support, Techtel provides end-to-end expertise in the design, development, implementation and operational support of broadcast systems infrastructures.

TECHTEL

SOLUTIONS

Sports and Live Events

Techtel enables sports and live event broadcasters deliver contextually relevant and professional experience to their users.

We do this by providing fully integrated solutions capable of encoding, storing and delivering live streams, as well as providing a platform for our customers to access, manage, edit and monetise content to their fan base.

AV Integration

Techtel provides customized audiovisual and broadcast video solutions of various scopes and sizes to enterprises, entertainment and sports, education, health and government organizations in Asia-Pacific region. Our end-to end AV solution includes building a customised sub-frame and LED Cabinet, complemented by video processing and creative services.

Education

Techtel is uniquely qualified to build new campus studios and control rooms, upgrade existing facilities to HD and leverage the latest innovations in online broadcasting to enrich the teaching and campus facilities for the education sector. Techtel is a local representative of AP ENPS - a multi-platform News Production System used by over 65,000 journalists around the world.

Enterprise

Techtel provides a complete Enterprise Media Platform for the companies most demanding boardroom, education, HR initiatives, retail, hospitality and other corporate applications, including:

- Corporate Training Networks
- Corporate Communication Networks
- Digital Signage, and many others

Systems Integration

Techtel designs, builds and supports full service studios and broadcast facilities for media broadcasters or any business with an enterprise video strategy requiring content generation.

Our portfolio includes Studio Production Systems, Post & remote production facilities; News & Sports Production Systems; OB trucks, satellite uplink vehicles and many more.

Object Storage

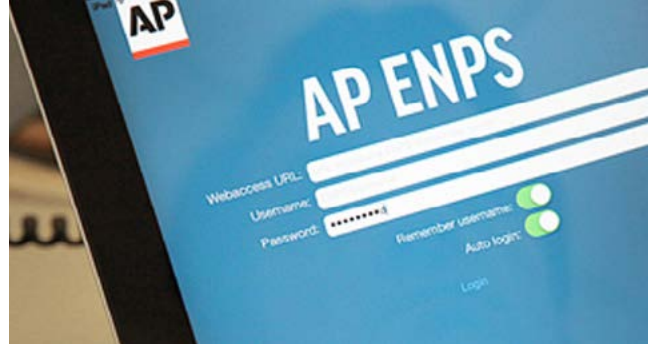

Techtel's fully-integrated Object Storage solution offers limitless capacity for information, which can be searched in real time, is cheaper and easier to manage and can be scaled with little to no limitations. We use scalable, non-proprietary technology which adapts to the content owners' storage needs and enables them to find and repurpose archived video and audio assets for additional revenue streams.

CASE STUDIES

ENPS News Production System for KompasTV

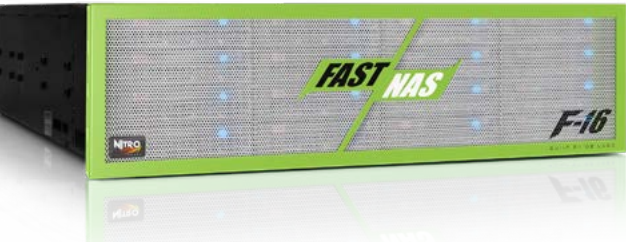

KompasTV , Indonesia's trusted independent media company has recently opened the doors of its brand new cutting-edge facility with the latest version of the News Production System by AP ENPS.

This new multi-year agreement includes providing all the latest features offered by the vendor including advanced mobile functionality and integrations with other systems including Astro EVS.

Network Attached Storage (NAS) solution for AETN All Asia Networks

AETN All Asia Networks, a global media content company, which operates and distributes History HD, Crime & Investigation Network, and BIO in 8 different countries deployed an industry-leading Network Attached Storage (NAS) solution by GBLabs Space to accommodate rapid expansion in their production and editing workflow. Integrated and supported by Techtel, GBLabs Space NAS provides powerful, intelligent and easily scalable media storage for demanding workflows.

Digital Terrestrial TV Transmitter for Digicel PNG

Techtel supplied, installed, commissioned and tested a new 600Wrms (2+1) DVB-T2 transmitter system for Digital Terrestrial TV in Papua New Guinea as well as seamlessly integrated the platform into Port Moresby's existing transmission facilities by adding a new RF combiner with two narrow-band and one wide-band inputs. As a result, Papua New Guinea's local service provider, Digicel can now deliver more than 30 additional services for its subscribers in Port Moresby.

ENPS News Production System for Astro Arena

Malaysia's leading Sports channel Astro Arena broadcasts their Nadi Arena program using the latest version of AP ENPS - a leading News Production System with multiplatform Mobile functionality, implemented, managed and supported by Techtel for almost ten year.
